

International & Community Matchmaker

Intermédiaire communautaire et internationale

Northeastern Ontario: Greater Sudbury
A project that offers employability support for potential immigrants, migrants within Canada, and employers seeking skilled talent.

In order to maintain current population levels, Ontario's northern regions need to attract 150,000 people by the year 2041. This project is designed to help Northern and Rural communities build a skilled workforce and fill recognized labour shortages by helping immigrants and secondary migrants with employability support. Overall, attracting immigrants to rural communities has a number of important social and economic benefits. The International & Community Matchmaker project is non-restricted, and will assist immigration efforts for the Greater Sudbury region.

Services Include:

- General employability and referral supports for potential immigrants, international students, temporary workers and secondary migrants.
- Creating connections to the most appropriate services, programs, agencies and opportunities available, as well as helping to support permanent residency in Northern Ontario.
- Employer Support: Workforce diversity initiatives and skills matching with international talent.

What the project does not do:

This project does not offer immigration consulting, settlement services or any other employment related support service currently offered to permanent residents and protected refugees that can access support through Immigration, Refugees and Citizenship Canada and the Ontario Ministry of Citizenship and Immigration funded programs and services.
